Hydrobiologia

The International Journal on Limnology and Marine Sciences

Volume 469, 1 February 2002

Special Issue

Ecological Processes and Ecosystems:
Functioning Towards Water Purification

Guest Editors

Sergei A. Ostroumov, Steven C. McCutcheon & Christian E.W. Steinberg

Preface vii

***In situ* biofiltration: a means to limit the dispersal of effluents from marine finfish cage aquaculture**
Dror L. Angel, Noa Eden, Stephen Breitstein, Amir Yurman, Timor Katz, Ehud Spanier 1–10

Nitrate elimination by denitrification in hardwood forest soils of the Upper Rhine floodplain – correlation with redox potential and organic matter
Ingrid Brettar, José-Miguel Sanchez-Perez, Michèle Trémolières 11–21

Photochemical degradation of PAHs in freshwaters and their impact on bacterial growth – influence of water chemistry
Stefan Bertilsson, Anneli Widenfalk 23–32

Change of phytoplankton composition and biodiversity in Lake Sempach before and during restoration
Hansrudolf Bürgi, Pius Stadelmann 33–48

Interactions between calcite precipitation (natural and artificial) and phosphorus cycle in the hardwater lake
Maria Dittrich, Rainer Koschel 49–57

Molecular assessment of the potential for *in situ* bioremediation of PCBs from aquatic sediments
Matthew J. Hoostal, George S. Bullerjahn, R. Michael L. McKay 59–65

Changes in nutrient retention capacity of boreal aquatic ecosystems under climate warming: a simulation study
Paula Kankaala, Anne Ojala, Tiina Tulonen, Lauri Arvola 67–76

Denitrification in the water column of an intermittently anoxic fjord
Svein Kristiansen, Morten Thorne Schaanning 77–86

Performances of constructed wetlands for municipal wastewater treatment in rural mountainous area
Gérard Merlin, Jean-Luc Pajean, Thierry Lissolo 87–98

The role of sedimentation and resuspension for the transport of sediments and contaminants in the Skagerrak
Thomas T. Noji, Carola I.-M. Noji, Jarle Klungsøyr 99–108

Inorganic carbon fluxes at the water–sediment interface in five littoral systems in Spain (southern Europe)
T. Ortega, R. Ponce, J.M. Forja, A. Gómez-Parra 109–116

Inhibitory analysis of top-down control: new keys to studying eutrophication, algal blooms, and water self-purification
S.A. Ostroumov 117–129

Heavy metals in the Rosetta estuary of the Nile and the adjoining Mediterranean waters: evidence of removal of dissolved heavy metals from waters as a result of possible binding to suspended matter
Massoud A. H. Saad, Ehsan M. Hassan 131–147

The effect of biological factors on the efficiency of river biofilms in improving water quality
Sergi Sabater, Helena Guasch, Anna Romaní, Isabel Muñoz 149–156

Herbicide bioconcentration in *Cladophora glomerata*: atrazine removal in a eutrophic agricultural river
Alicia D. Shelton, Michael C. Miller 157–164

Microbial community analysis by FISH for mathematical modelling of selective enrichment of gel-entrapped nitrifiers obtained from domestic wastewater
Christian Vogelsang, Andreas Schramm, Cristian Picioreanu, Mark C. M. van Loosdrecht, Kjetill Østgaard 165–178

Contribution of biological processes to self-purification of water with respect to petroleum hydrocarbon associated with No. 0 diesel in Changjiang Estuary and Jiaozhou Bay, China
Xiulin Wang, Yu An, Jun Zhang, Xiaoyong Shi, Chenjian Zhu, Ruixiang Li, Mingyuan Zhu, Shang Chen 179–191

Water purification using sand
R.S. Wotton 193–201

Polyfunctional role of biodiversity in processes leading to water purification: current conceptualizations and concluding remarks
S.A. Ostroumov 203–204
